Einleitung:

Die noch vorhandenen Kirchenbücher, die in Österreich vor der Einführung des Standesamtes 1938/1939 seit 1784 für den Staat standesamtliche Aufzeichnungen über Geburt (= Taufen), Trauungen und Sterbefälle (=Begräbnisse) sind, bieten meist den einfachsten Weg, seine Vorfahren zu erforschen. Leider sind viele Matriken vor dem 30jährigen Krieg nicht erhalten geblieben, Matriken vor 1600 eine Rarität.

Aufgrund fehlender Kirchenbücher vor ca. 1550 finden wir Kurrent bereits zu Beginn der Matriken. Schreiben war in früheren Zeiten ein Privileg, meist des Adels und der Kirche und weniger Bürgerlicher. Noch um 1850 finden wir nicht selten ein Kreuzerl anstatt einer Unterschrift. Daher waren auch Rechtschreibung, Stil und Schriftführung nicht einheitlich: Man schrieb, wie man schreiben konnte, eine einheitliche Orthographie gab es praktisch nicht. Sie war auch nicht wichtig. Viel wichtiger waren Namen, Herkunftsorte, Kirchenfeste und die Phonetik.

Im Internet findet man eine Fülle von Buchstabentabellen mit teilweise auch aus Kirchenbüchern kopierten Buchstaben. Im Gegensatz zum Schreiben befürworte ich allerdings beim Erlernen des Lesens von Kurrent die so genannte Ganzheitsmethode von kompletten Texten bzw. zumindest von Wörtern. Gründe dafür sind nicht nur die teilweise fehlende Orthographie, sondern auch Sprache und Grammatik. Und natürlich unterscheidet sich der Schriftstil des Schreibers oft vom Ideal.

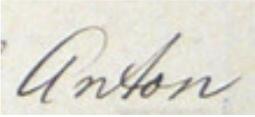

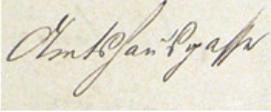

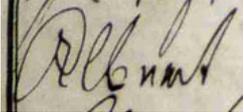

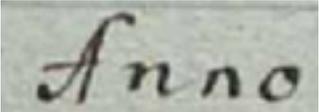

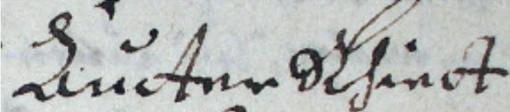

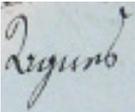

Im ersten Teil des Skriptums finden Sie eine Aufstellung der Großbuchstaben, im zweiten Teil jene der Kleinbuchstaben bzw. –kombinationen und Endungen. Diese Liste wird keinesfalls komplett sein und wird laufend erweitert werden. Die Bilder wurden absichtlich nicht aufgehellt, Schriftteile anderer Zeilen oder Wörter nicht entfernt; auch in der Realität greifen Schriftzeilen ineinander.

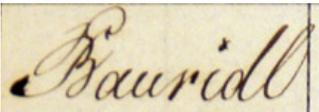

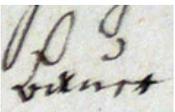

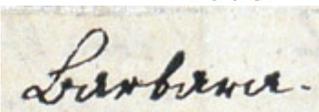

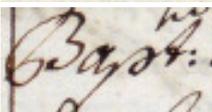

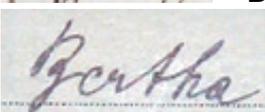

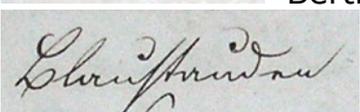

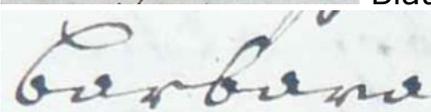

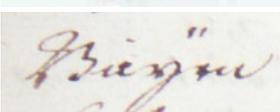

Für Ihre Fragen und Anregungen stehe ich Ihnen gerne zur Verfügung.
